Welcome to the
Real Estate Derivatives Summit

Prof. Mathias Hoffmann
Economics Dept., University of Zurich & CUREM
Globalization of Real Estate: Opportunities

Figure 1: Pairwise correlations of quarterly housing and equity returns for the 16 industrialized countries under study. The sample period is 1985Q1:2008Q1. The black line is the 45-degree line.
Globalization of Real Estate: Risks

Figure 1: Capital Inflows and House Valuations, 1991-2012

NOTES: The figure plots US current account to GDP ratio (red solid line) against average house price-income ratios for states that deregulated their interstate banking before 1985 (blue dashed line) and states that deregulated after 1987 (green circle-dashed line).
